

JEN COIN

PITCH DECK

Jen coin trading platform of the future!

First decentralized currency platform that allows services of fast and secure transaction through Jen coin

THE BEGINNING OF JEN COIN

Cryptocurrency platforms often fall short of their claims of safety, primarily due to mishandling of information. One notable example is Bitcoin, which gained popularity in 2018. Numerous cases have emerged where Bitcoin account owners were hacked, resulting in the loss of their digital currency.

This unfortunate outcome was a direct consequence of the platform's failure to safeguard the owner's information. As we explored various cryptocurrencies online, it became evident that there was a pressing need for a secure platform that prioritizes user anonymity and data protection. Additionally, such a platform must incorporate robust encryption to uphold privacy standards for traders.

This demand for a private and secure platform will be met in August 2022 with the introduction of JEN COIN to the market.

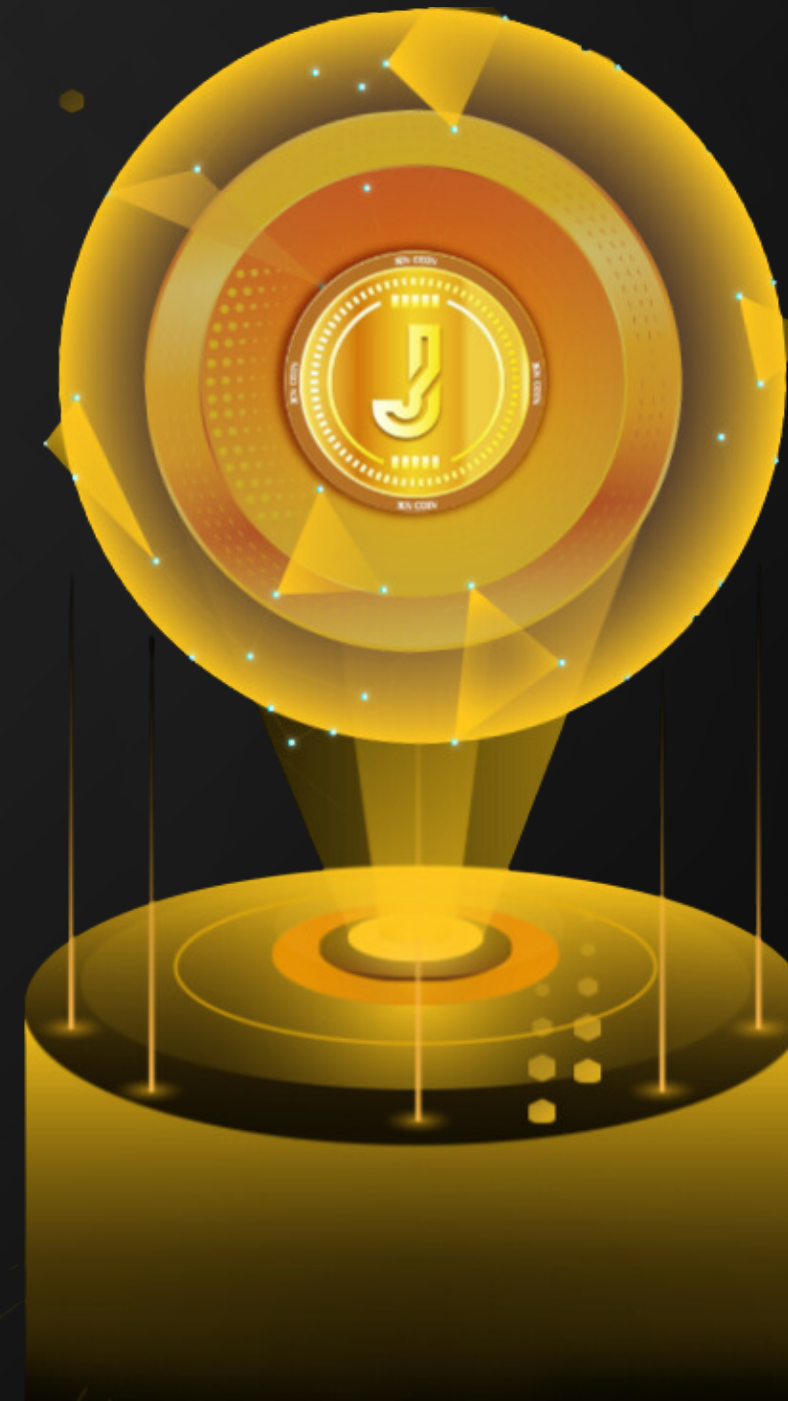

About Jen coin

Why to choose Jen coin?

Jen coin is built on the Binance smart chain. Which aims to create a decentralised currency platform where users can transfer money using our currency.

Our working protocol Binance Smart Chain P2P has assisted us in developing a network of widely used payment channels as options for your P2P transactions, allowing our users to transfer money around the world quickly and without fear of disruptions, reimbursements, or processing issues

JEN COIN MISSION

The JEN coin, as a fully decentralised cryptocurrency, will have its own block chain explorer by the end of 2023, ensuring anonymous transactions. As it establishes a legal connection of public capital, blockchain represents a secure method of providing services.

The JEN block chain's solid and unalterable data protects both parties, the loan provider and the borrower. JEN coin has introduced the plan of launching a chatting application on which the JEN Team is currently working in order to make the JEN system fully encrypted and keeping anonymity the most prior idea of the business

Feature of Jen coin

These are the features that makes JEN coin stand out among the other cryptocurrency on the digital market:

Transparency

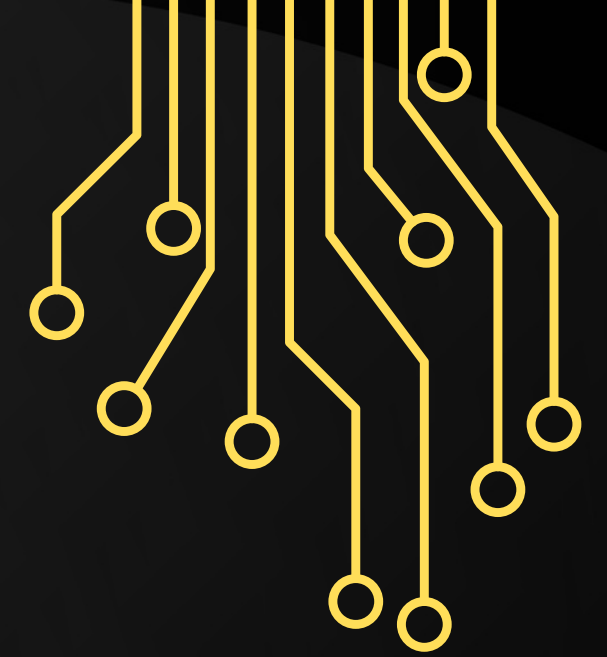

Decentralization allows the transactions taken place to be untraceable. The transfer of control and decision-making from a centralized entity (individual, organization, or group thereof) to a distributed network is referred to as decentralization. Decentralized cryptocurrencies have proven to be an invaluable lifeline for those who were previously denied access to traditional financial systems. In addition, the transactions are under the control of the dealer, there is no limit to the amount of currency, and the dealer can keep the confidentiality of its transaction.

Security

JEN is a trustworthy and secure project with a completely decentralized policy. It allows you to buy and sell with complete confidence and trust because our encrypted escrow system keeps the entire trading process transparent and secure. Users can be confident in their participation in Jen.

Low Trading Fee

We created a low-fee cryptocurrency (JEN coin) to address the high trading fees charged by other networks. Our fees are as low as \$0.001, ensuring it won't burden your wallet. Our goal is to benefit wallet owners by minimizing trading fees and empower users to operate their own independent bank through our banking software. We aim to provide accessible and robust banking services worldwide.

Our Technology Services

We deal in user privacy
our aim is to keep the
anonymity of user as
much as we can.

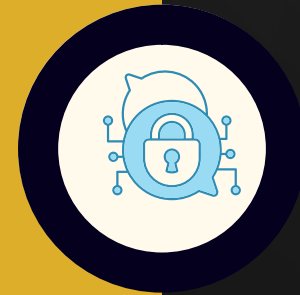

Safe and Secure

Jen is a fair and safe project with a complete decentralized policy. The users can be a part of Jen with complete surety.

Early Profit

Jen coin will allow you to get early profit and to fulfil your dream

End to end encrypted

Encryption is the process of using an algorithm that transforms standard text characters into an unreadable format. End-to-end encryption uses this same process, too.

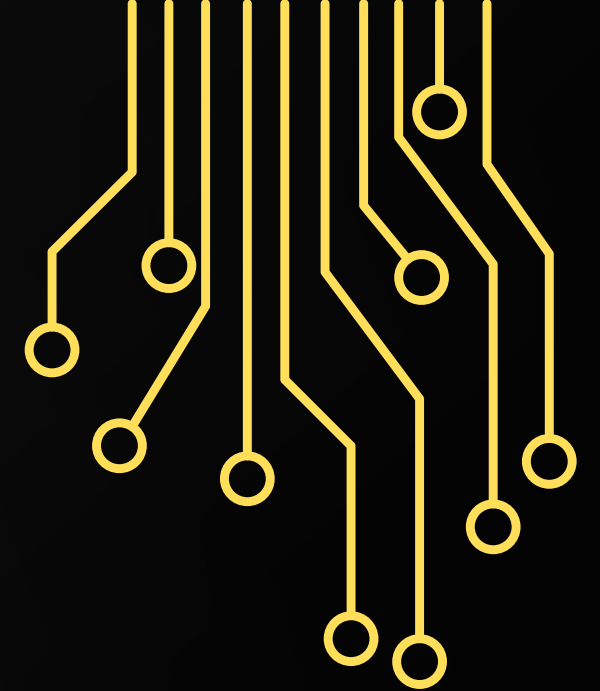

Easy to Buy & Sale Token

Jen coin is very easy to buy through different exchanges and also direct through us.

Fast Transaction

Simply sign up to start trading Jen coins instantly with both local and global users. And then get transaction all over the world.

ROADMAP JEN COIN

Utilities of JEN COIN LIVE PROJECT

1. JEN GAMES

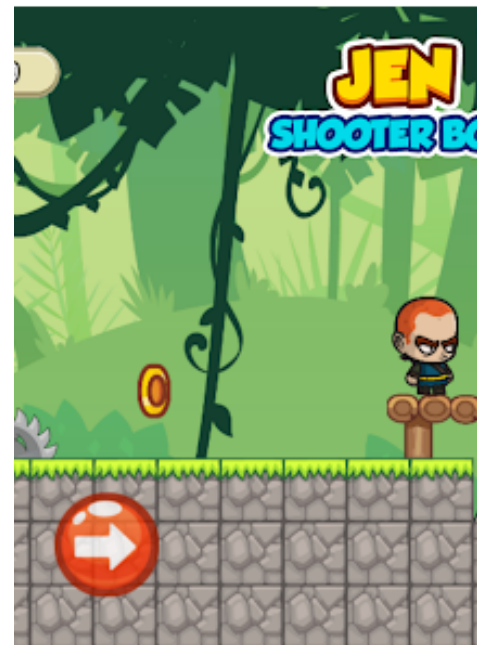

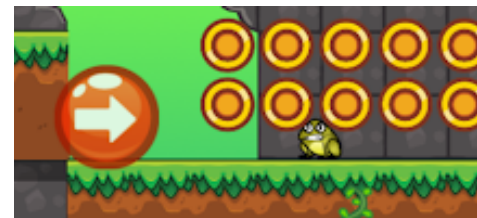

Jen Angel Runner

Jen Runner is an exciting crypto game where players earn real Jen Coin, a valuable cryptocurrency. Players complete challenges, collect Jen Coins, and can exchange them for other cryptocurrencies or traditional currencies.

It's a rewarding and entertaining gaming experience that lets you generate tangible value. Join Jen Runner to dive into a virtual world and unleash your gaming prowess while earning and trading real-world value.

Jen Shooting Boy

Jen Shooting Boy: Earn real Jen Coin, a valuable cryptocurrency, through exhilarating shooting challenges. Accumulate rewards, trade on the market, and generate profits.

Immerse yourself in a unique gaming experience that merges cryptocurrency and excitement. Join now to earn, trade, and unleash your potential with Jen Shooting Boy.

2. JENLottery

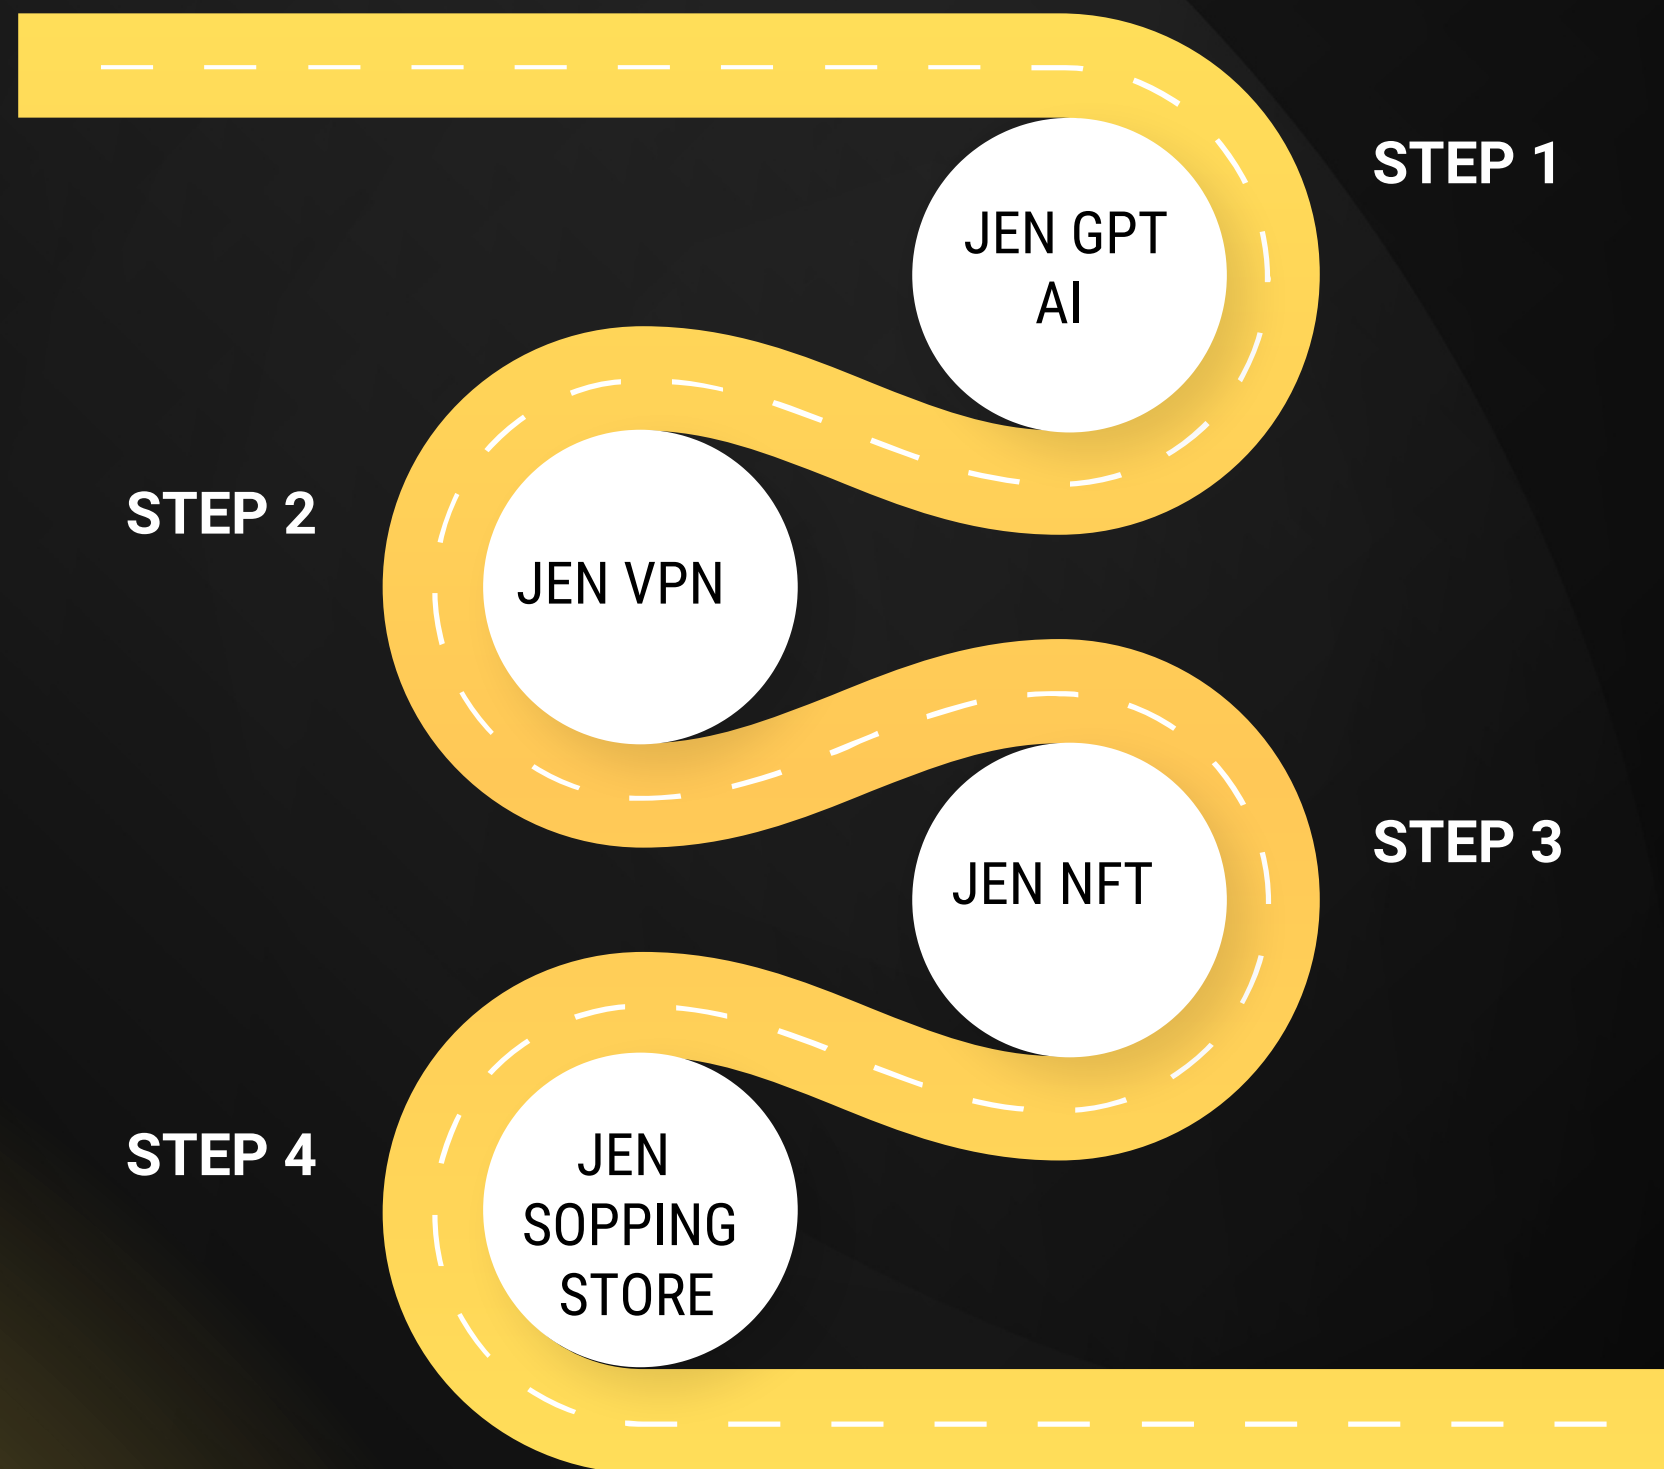

Jen Lottery is an exciting crypto lottery game where you can win real Jen Coins. It combines traditional lotteries with cryptocurrency. Buy tickets with crypto or fiat, wait for the draw, and hope for the lucky numbers.

Winners share the prize pool in Jen Coins, which can be traded for profit. Jen Lottery offers a thrilling experience for lottery and crypto enthusiasts. Join now and embrace the exciting world of Jen Lottery!

NEXT JEN PROJECT

Utilities of JEN COIN

NEXT PROJECT

Jen VPN

JEN Coin, a cryptocurrency, is launching its GPT AI app, propelling it to the forefront of the crypto and AI intersection. This innovative app harnesses advanced natural language processing and machine learning to revolutionize industries. Users can access various features and services, including generating coherent paragraphs on specific topics. Content creators, researchers, and those seeking quick and accurate information will benefit greatly.

The app also offers personalized recommendations based on user preferences and browsing history, facilitates real-time language translation, and promotes global connectivity.

Jen Shopping Store

Jen Coin, a cryptocurrency, is launching its own crypto shopping store to revolutionize crypto usage. Holders can now use their Jen Coins to buy various products and services, from electronics to clothing, gift cards to household items.

This platform enhances Jen Coin's value and offers a convenient shopping experience for crypto enthusiasts. By embracing this innovation, Jen Coin becomes a trailblazer, paving the way for wider acceptance of digital currencies in retail.

Jen NFT

Jen Coin, a cryptocurrency, is launching its own online store, revolutionizing cryptocurrency usage in everyday life. Users can now use their Jen Coins to buy a wide range of products and services, including electronics, clothing, household items, and gift cards.

This platform enhances the utility and value of Jen Coin while providing a convenient shopping experience for crypto enthusiasts. By embracing this concept, Jen Coin leads the way in cryptocurrency adoption and acceptance in retail.
